

## TABLE OF CONTENTS

	Page
ACKNOWLEDGMENT	III
ABSTRACT IN THAI	IV
ABSTRACT IN ENGLISH	VI
TABLE OF CONTENTS	VIII
LIST OF TABLES	X
LIST OF FIGURES	XIII
CHAPTER 1 INTRODUCTION	1
1.1 Background information	1
1.2 Objectives of the research	3
1.3 Useful of the Research	3
CHAPTER 2 LITERATURE REVIEW	4
2.1 Green soya bean	4
2.2 Yoghurt	19
2.3 Ice cream	27
2.4 Probiotic bacteria	33
2.5 Stabiliser	49
CHAPTER 3 MATERIALS AND METHODS	54
3.1 Materials	54
3.2 Chemical reagents	54
3.3 Chemical and media for culturing and enumeration of bacteria	55
3.4 Equipments	55
3.5 Research designs and methods	56

CHAPTER 4 RESULTS AND DISSCUSSION	72
4.1 Analysis of green soya bean and green soya bean milk composition.	72
4.2 Study the physical, chemical, microbiological and sensory characteristics of a prototype green soya bean yoghurt ice cream.	74
4.3 Development of green soya bean yoghurt ice cream formula.	80
4.4 Study the optimum time and temperature incubation for the production of green soya bean yoghurt ice cream.	99
4.5 Study the shelf life of green soya bean yoghurt ice cream.	104
CHAPTER 5 CONCLUSION AND RECOMMENDATION	115
5.1 Conclusion	115
5.2 Recommendation	117
REFERENCES	118
APPENDIX A	123
APPENDIX B	128
APPENDIX C	132
APPENDIX D	137
APPENDIX E	154
CURRICULUM VITAE	162

## LIST OF TABLES

<b>Table</b>	<b>Page</b>
2.1 Nutritional content of some green soya bean and pea products	10
2.2 Quality characteristics and associated chemical compounds of green soya beans	11
2.3 The composition of different frozen yoghurt	24
2.4 Typical ice cream formulas	28
2.5 Advantages and limitations of selected ice cream constituents	31
2.6 List of species (by alphabetical order) of the genera <i>Lactobacillus</i> and <i>Bifidobacterium</i>	34
2.7 Criteria for selection of probiotics	35
2.8 Potential health and nutritional benefits of functional foods prepared with probiotic bacteria	37
3.1 A prototype formula of green soya bean yoghurt ice cream	58
3.2 The Plackett and Burman design for green soya bean yoghurt ice cream.	63
3.3 The level of experimental factors used in the Plackett and Burman design	64
3.4 The levels (%) (w/v) of skim milk and sugar of green soya bean yoghurt ice creams that were studied in a factorial design experiment	65
3.5 The levels of green soya bean yoghurt ice cream ingredients that did not significantly affected the quality of the final product	65
3.6 Different levels of temperature (°C) and time (h) incubation conditions to ferment green soya bean milk	67
3.7 The composition of green soya bean yoghurt ice cream ingredients	67
4.1 Analyses of green soya bean and green soya bean milk	72
4.2 The population of ABT-5 starter cultures from a freeze-dried culture in green soya bean milk and green soya bean yoghurt after an incubation at 43°C for 6 h.	74
4.3 The colony characteristics, cells shapes and Gram staining of ABT-5 starter cultures for producing green soya bean yoghurt ice cream.	76

4.4 Sensory characteristics of the prototype and ideal products of green soya bean yoghurt ice cream	77
4.5 Physical, chemical and microbiological qualities of the prototype product of green soya bean yoghurt ice cream	79
4.6 The physical quality of green soya bean yoghurt ice cream in the Plackett and Burman design experiment	81
4.7 The chemical quality of green soya bean yoghurt ice cream in the Plackett and Burman design experiment	81
4.8 The microbiological quality of green soya bean yoghurt ice cream in the Plackett and Burman design experiment	82
4.9 The sensory quality of green soya bean yoghurt ice cream in Plackett and Burman design experiment	82
4.10 The effect of individual ingredients on the physical quality of green soya bean yoghurt ice cream based on the Plackett and Burman design experiment	84
4.11 The effect of individual ingredients on the chemical quality of green soya bean yoghurt ice cream based on the Plackett and Burman design experiment	85
4.12 The effect of individual ingredients on the microbiological quality of green soya bean yoghurt ice cream based on the Plackett and Burman design experiment	86
4.13 The effect of individual ingredients on the sensory quality of green soya bean yoghurt ice cream based on the Plackett and Burman design experiment	87
4.14 The effect of skim milk and sugar on the physical quality of green soya bean yoghurt ice cream	94
4.15 The effect of skim milk and sugar on the chemical quality of green soya bean yoghurt ice cream	95
4.16 The effect of skim milk and sugar on the microbiological quality of green soya bean yoghurt ice cream	96

4.17 The effect of skimmed milk and sugar to the sensory quality of green soya bean yoghurt ice cream (a ratio between a product treatment and an ideal product)	97
4.18 The effect of different incubation times and temperatures on the physical quality of green soya bean yoghurt ice cream	99
4.19 The effect of different incubation times and temperatures on the chemical quality of green soya bean yoghurt ice cream	100
4.20 The effect of different incubation times and temperatures on the microbiological quality of green soya bean yoghurt ice cream	101
4.21 The effect of different incubation times and temperatures on the sensory quality of green soya bean yoghurt ice cream (showed in ratio mean score)	102
4.22 The optimum formula to produce green soya bean yoghurt ice cream	104
4.23 The physical, chemical and microbiological characteristics of a developed product of green soya bean yoghurt ice cream	105
4.24 Sensory test of the developed product of green soya bean yoghurt ice cream and ratio mean score	107
4.25 The physical quality of green soya bean yoghurt ice cream during storage at -18°C for 4 months	109
4.26 The chemical quality of green soya bean yoghurt ice cream during storage at -18°C for 4 months	110
4.27 The microbiological quality of green soya bean yoghurt ice cream during storage at -18°C for 4 months	112
4.28 The sensory characteristics of green soya bean yoghurt ice cream during storage at -18°C for 4 months	113

## LIST OF FIGURES

Figure	Page
2.1 Morphologies of (a) <i>Streptococcus thermophilus</i> and (b) <i>Lactobacillus bulgaricus</i> under an electron microscope.	21
2.2 Outline for the stimulation and the inhibit of the growth of yoghurt bacteria in milk	22
2.3 Production steps of set, stirred and drinking yoghurt	23
2.4 Production steps of frozen yoghurt	24
2.5 An ice cream process	32
2.6 The numerically dominant microbial genera in the adult human gastrointestinal tract	36
2.7 Morphology of <i>Lactobacillus acidophilus</i> under an electron microscope	39
2.8 Morphology of <i>Bifidobacterium bifidum</i> under an electron microscope	44
2.9 Formation of 2 molecules of lactate and 3 molecules of acetate from 2 molecules of glucose by bifidobacteria	44
2.10 Structure of $\kappa$ -carrageenan	50
2.11 Structure of carboxymethylcellulose (CMC)	51
2.12 Structure of guar gum	53
3.1 The production process of green soya bean yoghurt ice cream	60
4.1 The sensory profile of the prototype and ideal product of green soya bean yoghurt ice cream	78
4.2 Sensory characteristics profile of prototype, developed and ideal products of green soya bean yoghurt ice cream	108
