ACKNOWLEDGEMENT	III
ABSTRACT (ENGLISH)	IV
ABSTRACT (THAI)	VI
TABLE OF CONTENTS	VIII
LIST OF TABLES	XII
LIST OF ILLUSTRATIONS	XIII
ABBREVIATIONS	XVI
I. INTRODUCTION	
1.1 Statement and significance of problem	1
1.2 Literature reviews	6
1.2.1 Platelet physiology	6
1.2.2 Thrombopoiesis	6
1.2.3 Megakaryocytic cells	7
1.2.3.1 Early development	7
1.2.3.2 Megakaryoblast	7
1.2.3.3 Promegakaryocyte or basophilic megakaryocyte	8
1.2.3.4 Granular megakaryocyte	8
1.2.3.5 Platelet release	8
1.2.4 Platelet structure	9
1.2.4.1 Peripheral zone	10
1.2.4.2 Structural zone	17
1.2.4.3 Organelle zone	18
1.2.4.4 Membranous systems	21

1.2.5 Platelet function	23
1.2.5.1 Platelet adhesion	24
1.2.5.2 Platelet shape change	25
1.2.5.3 Platelet release reaction	25
1.2.5.4 Platelet aggregation	26
1.2.6 Flow cytometry	28
1.2.6.1 Flow cytometry	28
1.2.6.2 Flow cytometry for platelet studies	28
1.2.6.3 Platelet surface markers	29
1.2.7 Thalassemia	31
1.2.7.1 Basic knowledge of thalassemia	31
1.2.7.2 Molecular defects of α -thalassemia	32
1.2.7.3 Molecular defects of β -thalassemia	35
1.2.7.4 Clinical features of β -thalassemia	37
β -Thalassemia	37
β -Thalassemia minor	37
β -Thalassemia intermedia	38
β -Thalassemia major	38
1.2.7.5 Thalassemia and oxidative stress	39
1.2.7.6 Thromboembolic manifestations in β -thalassemia	42
Thalassemia and coagulation defects	42
Deep venous thrombosis and pulmonary embolism	43
Cerebral thrombosis	45
Hypercoagulable state in thalassemia	46
1.2.7.7 Platelet activation	49

1.3 Objectives	51
II. MATERIALS AND METHODS	
A. Materials	52
B. Methods	54
1. Preparation of anti-platelet mixture	54
2. Preparation of plasma samples for platelet aggregation test	54
3. Preparation of red blood cells for flow cytometric analysis	56
4. Preparation of platelets for scanning electron microscopy (SEM)	58
5. Preparation of plasma for enzyme linked immunosorbent assay (ELISA)	59
6. Preparation of platelets for flow cytometric analysis	61
7. Preparation of platelet rich plasma, plasma and red blood cells for co-culture	62
III. RESULTS	
1. General data of the subjects	67
2. Anti-platelet mixture	67
3. Complete blood counts (CBC) data	69
3.1 Comparison of blood cell parameters between β -thalassemic patients and healthy subjects	71
4. Platelet aggregation test	73
5. Red cell membrane phosphatidylserine (PS) exposure	76
5.1 Comparison of %PS exposing RBCs between β -thalassemic patients and healthy subjects	79
6. Platelet morphology by scanning electron microscopy (SEM)	80

6.1 Comparison of platelet morphology between β -thalassemic patients and healthy subjects using SEM	83
7. Plasma levels of β -thromboglobulin (β -TG) and platelet factor (PF4)	85
7.1 Comparison of plasma β -TG and PF4 concentration between β -thalassemic patients and healthy subjects	91
7.2 Relationship between plasma β -TG or PF4 levels and platelet count	94
7.3 Relationship between plasma β -TG and PF4 levels	95
7.4 Relationship of %activated platelets (by SEM) with plasma β -TG and PF4 levels	97
8. Activated platelets with CD63 expression (CD63 ⁺) counted by flow cytometry	98
8.1 Comparison of %CD63 ⁺ platelets in β -thalassemic patients and healthy subjects	101
8.2 Relationship of %CD63 ⁺ platelets and %activated platelets by SEM	102
8.3 Relationship of %CD63 ⁺ platelets and plasma β -TG and PF4 levels	102
8.4 Relationship of %PS exposing RBCs and %CD63 ⁺ platelets	103
9. Effect of β -thalassemic RBC and plasma on normal platelets (co-culture)	107
IV. DISCUSSION	114
V. CONCLUSION	122
VI. REFERENCES	124
VII. APPENDIX	141
CURRICULUM VITAE	149

LIST OF TABLES

TABLE	PAGE
1. Some important platelet membrane glycoproteins (GP)	13
2. Some important contents of platelet δ -granules and α -granules	20
3. Monoclonal antibodies for flow cytometric determination of immunological platelet activation	30
4. Complete blood counts data	70
5. Platelet count in the patients with and without splenectomy	71
6. Platelet aggregability in β -thalassemia major and β -thalassemia/Hb E	75
7. Percentages of PS exposing RBCs	76
8. Percentages of PS exposing RBCs in β -thalassemia with and without splenectomy	76
9. Platelet morphology by SEM	81
10. Plasma β -TG and PF4 concentration in IU/mL and IU/ 10^6 plt	86
11. Plasma β -TG and PF4 concentration in IU/mL and IU/ 10^6 plt of β -thalassemia with and without splenectomy	87
12. Plasma levels of β -TG and PF4	88
13. Platelet activation markers and platelet morphology by SEM	96
14. Percentages of CD63 ⁺ platelets	98
15. Percentages of CD63 ⁺ platelets in the patients with and without splenectomy	98
16. Percentages of PS exposing RBCs and CD63 ⁺ platelets	104
17. The overall results of 3 pairs of co-culture	108

LIST OF ILLUSTRATIONS

FIGURE	PAGE
1. Development of megakaryocytic cells	9
2. Ultrastructure of platelet	10
3. Mechanism for signal transduction in platelet activation	17
4. Mechanism of platelet plug formation	27
5. Structure of β -globin and α -globin genes	37
6. Structure of normal plasma membrane	48
7. Mechanism phosphatidylserine (PS) distributions	48
8. Hypercoagulable state in thalassemia	50
9. Platelet aggregometer model Aggrecoorder II (PA-3220)	55
10. Agonist reagents for platelet aggregation test	55
11. Flow cytometer model Becton Dickinson FACSort	57
12. Scanning electron microscope model JSM-840A	58
13. Processing of specimens for all analyses	65
14. Effect of individual anti-platelet drugs on platelet aggregation	68
15. Effect of anti-platelet mixture on platelet aggregation test	68
16. Comparison red blood cell count, hemoglobin and hematocrit	72
17. Comparison MCV, MCH and MCHC	72
18. Comparison of platelet count	73
19. Flow cytometric histogram of non-activated and activated RBC	77
20. Flow cytometric histogram of %PS exposing RBCs	78
21. Comparison of %PS exposing RBCs	79

FIGURE	PAGE
22. Scanning electron microscopic micrograph of healthy platelets	82
23. Scanning electron microscopic micrograph of thalassemic platelets	82
24. Comparison of platelet morphology by SEM	84
25. Comparison of platelet morphology by SEM in the patients	84
26. Calibration curve of plasma β -TG	85
27. Calibration curve of plasma PF4	85
28. Comparison of plasma β -TG concentration (IU/mL)	92
29. Comparison of plasma β -TG concentration (IU/ 10^6 plt)	92
30. Comparison of plasma PF4 concentration (IU/mL)	93
31. Comparison of plasma PF4 concentration (IU/ 10^6 plt)	93
32. Relationship of plasma β -TG levels and platelet count	94
33. Relationship of plasma PF4 levels and platelet count	94
34. Relationship of plasma β -TG and PF4 levels	95
35. Relationship between %activated platelets by SEM and plasma β -TG levels	97
36. Relationship between %activated platelets by SEM and plasma PF4 levels	97
37. Overlay flow cytometric histogram of CD63 ⁺ platelets	99
38. Flow cytometric histograms of %CD63 ⁺ platelets	100
39. Comparison of %CD63 ⁺ platelets	101
40. Relationship between %CD63 ⁺ platelets and %activated platelets by SEM	102
41. Relationship between %CD63 ⁺ platelets and plasma β -TG levels	102
42. Relationship between %CD63 ⁺ platelets and plasma PF4 levels	103
43. Relationship of %PS exposing RBCs and %CD63 ⁺ platelets	103
44. Comparison the ratio of activated platelets of 3 pairs of co-culture experiments	109

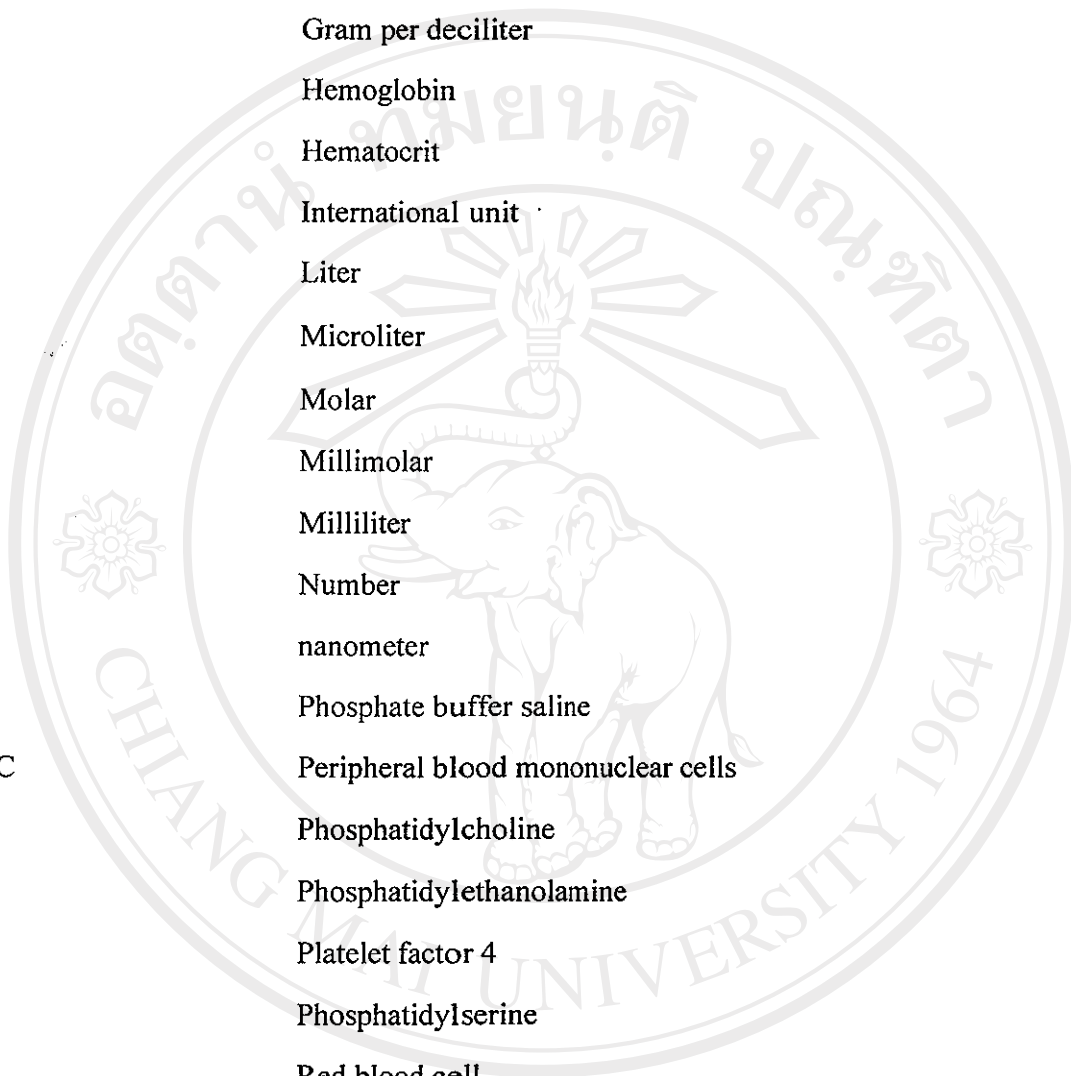

FIGURE	PAGE
45. Overall ratio of 3 pairs of co-culture experiments	109
46. Comparison of %CD63 ⁺ platelets after co-culture with RBC	110
47. Comparison of %CD63 ⁺ platelets after co-culture with unabsorbed plasma	111
48. Comparison of %CD63 ⁺ platelets after co-culture with absorbed plasma	112
49. Comparison of %CD63 ⁺ platelets by co-culture experiments	113

ABBREVIATIONS AND SYMBOLS

%	Percent
β	Beta
α	Alpha
γ	Gamma
ϵ	Epsilon
δ	Delta
$^{\circ}\text{C}$	Degree Celsius
Abs	Absorbance
ADP	Adenosine 5' diphosphate
AV	Annexin V
AVB	Annexin V buffer
BSA	Bovine serum albumin
β -TG	Beta-thromboglobulin
CBC	Complete blood cell count
CD42b	Glycoprotein Ib $_{\alpha}$
CD63	Glycoprotein 53
CPDA-1	Citrate-phosphate-dextrose-adenine formula 1
EDTA	Ethylenediaminetetraacetic acid dipotassium dihydrate
ELISA	Enzyme linked immunosorbent assay
Fe	Iron
FeSO ₄	Ferrous sulphate
g	Gravity

XVII

gm	Gram
g/dL	Gram per deciliter
Hb	Hemoglobin
Hct	Hematocrit
IU	International unit
L	Liter
μL	Microliter
M	Molar
mM	Millimolar
mL	Milliliter
No.	Number
nm	nanometer
PBS	Phosphate buffer saline
PBMC	Peripheral blood mononuclear cells
PC	Phosphatidylcholine
PE	Phosphatidylethanolamine
PF4	Platelet factor 4
PS	Phosphatidylserine
RBC	Red blood cell
RPM	Revolution per minute
SD	Standard deviation
SEM	Scanning electron microscopy
w/v	Weight per volume
WBC	White blood cell
v/v	Volume per volume
