ACKNOWLEDGEMENT

I would like to express my sincere gratitude and appreciation to my advisor, Associate Professor Rujapa Nimsung, for her excellent guidance and continuous discussion. Without her support and encouragement, this thesis would not have been successfully completed. Her kindness and sincerity will be remembered forever.

Also I would like to express my gratitude to my co-advisor, Dr. Taned Chitapanarux, Department of Internal Medicine, Faculty of Medicine, for his kindness, valuable suggestion and correction of this thesis.

I would like to extend my special appreciation to Dr. Dorn Watthanakulpanich, Faculty of Tropical Medicine, Mahidol University, and Dr. Ratchada Cressey, Department of Clinical Chemistry, Faculty of Associated Medical Science, Chiang Mai University, for their valuable advices, comment and approval of my thesis articles, particularly to Dr. Ratchada Cressey for permission to use some reagents for Western blot analysis in this study. I would like to offer my special thanks for their kindness.

Many special thanks are also extended to my dear friends in faculty of Associated Medical Sciences, Chiang Mai University, for their help and warm friendship. I would like to offer my special thanks to Onusa Wattananupong for her advise in Western blot analysis.

In addition, my heart felts thanks go to my parents and my sisters for their love, patience, understanding and encouragement throughout my study.

I would like to express my appreciation to the board of directors of Thoen Hospital, Lampang, for their permission to provide me with the opportunity to study this cause.

I would like to thanks a number of staff in the Department of Clinical Chemistry, Faculty of Associated Medical Sciences, and the Department of Internal Medicine, Faculty of Medicine, Chiang Mai University for their supports in providing instruments, a convenient performing and collected specimens in this study.
