ACKNOWLEDGEMENT	iii
ABSTRACT	iv
LIST OF TABLES	xiii
LIST OF FIGURES	xiv
ABBREVIATIONS	xvii
CHAPTER I: INTRODUCTION	
1.1 Statement of problems	1
1.2 Literature review	5
1.2.1 Cancer	5
1.2.1.1 Genes involved in human cancer	6
1.2.1.2 Causes of cancer	10
1.2.2 Leukemia	16
1.2.2.1 Classification of leukemia	17
1.2.2.2 Cause of leukemia	37
1.2.2.3 Genes involved in leukemia	42
1.2.2.4 Leukemic cell lines	44
1.2.3 <i>Wilms' tumor1 (WT1)</i> gene and its product (WT1 protein)	45
1.2.3.1 Expression of <i>WT1</i> gene in normal and malignant tissues	50
1.2.3.2 Expression of <i>WT1</i> gene in normal and malignant hemopoietic cells	51
1.2.4 Turmeric curcuminoids	52
1.3 Objectives	63
CHAPTER II: MATERIALS AND METHODS	
2.1 Chemicals and reagents	64
2.2 Cell and cell culture condition	64
2.3 Turmeric curcuminoid extracts	64

2.4 Turmeric curcuminoids treatment	64
2.5 3-(4, 5-dimethylthiazol-2-yl)-2, 5-diphenyltetrazolium bromide (MTT) assay	65
2.6 Preparation of total RNA extract	65
2.6.1 Total RNA extraction	65
2.6.2 Measurement of purity and concentration of total RNA extract	66
2.7 Effect of turmeric curcuminoids on <i>WT1</i> gene expression	67
2.8 Preparation of nuclear membrane protein extract for WT1 protein measurement	68
2.8.1 Nuclear membrane protein extraction	68
2.8.2 Measurement of protein concentration	68
2.9 Protein determination by SDS-PAGE, Western blot analysis and ECL detection	70
2.9.1 Sodium dodecyl sulfate polyacrylamide gel electrophoresis (SDS-PAGE)	70
2.9.2 Western blot analysis and ECL detection for WT1 protein detection	71
2.9.3 Stripping method	72
2.9.4 Western blot analysis and ECL detection for GAPDH protein detection	72
2.10 Cytotoxicity of curcuminoids on leukemic cell lines by MTT assay	73
2.11 Determination of the levels of WT1 mRNA in leukemic cell lines	73
2.12 Determination of the levels of WT1 protein in leukemic cell lines	74
2.13 Effect of turmeric curcuminoids on <i>WT1</i> gene expression	74
2.14 Effect of turmeric curcuminoids on <i>WT1</i> gene expression in a dose dependent manner	74
2.15 Effect of turmeric curcuminoids on <i>WT1</i> gene expression in a time dependent manner	75
2.16 Effect of turmeric curcuminoids on WT1 protein expression	75

2.17 Effect of turmeric curcuminoids on WT1 protein expression in a dose dependent manner	76
2.18 Effect of turmeric curcuminoids on WT1 protein expression in a time dependent manner	76
2.19 Statistical analysis	76
CHAPTER III: RESULTS	
3.1 Cytotoxicity of turmeric curcuminoids on leukemic cell lines	78
3.2 Level of <i>WT1</i> gene expression in leukemic cell lines	78
3.3 Effect of turmeric curcuminoids on K562 cell line	84
3.3.1 Effect of turmeric curcuminoids on K562 cell morphology and viability	84
3.3.2 Effect of curcuminoids derivatives on <i>WT1</i> gene expression in K562 cell line	84
3.3.3 Effect of concentration of pure curcumin on <i>WT1</i> gene expression in K562 cell line	87
3.3.4 Effect of duration of pure curcumin treatments on <i>WT1</i> gene expression in K562 cell line	87
3.4 Effect of turmeric curcuminoids on U937 cell line	92
3.4.1 Effect of turmeric curcuminoids on U937 cell morphology and viability	92
3.4.2 Effect of curcuminoids derivatives on <i>WT1</i> gene expression in U937 cell line	92
3.4.3 Effect of concentrations of pure curcumin on <i>WT1</i> gene expression in U937 cell line	95
3.4.4 Effect of duration of pure curcumin treatments on <i>WT1</i> gene expression in U937 cell line	95
3.5 Effect of turmeric curcuminoids on HL-60 cell line	100
3.5.1 Effect of turmeric curcuminoids on HL-60 cell morphology and viability	100

3.5.2 Effect of curcuminoids derivatives on <i>WT1</i> gene expression in HL-60 cell line	100
3.5.3 Effect of concentrations of pure curcumin on <i>WT1</i> gene expression in HL-60 cell line	103
3.5.4 Effect of duration of pure curcumin treatments on <i>WT1</i> gene expression in HL-60 cell line	103
3.6 Effect of turmeric curcuminoids on Molt4 cell line	108
3.6.1 Effect of turmeric curcuminoids on Molt4 cell morphology and viability	108
3.6.2 Effect of curcuminoids derivatives on <i>WT1</i> gene expression in Molt4 cell line	108
3.6.3 Effect of concentrations of pure curcumin on <i>WT1</i> gene expression in Molt4 cell line	111
3.6.4 Effect of duration of pure curcumin treatments on <i>WT1</i> gene expression in Molt4 cell line	111
3.7 Level of WT1 protein in leukemic cell lines	116
3.8 Effect of curcuminoids on WT1 protein level in K562 cell line	116
3.8.1 Effect of curcuminoids derivatives on WT1 protein level in K562 cell line	116
3.8.2 Effect of concentrations of pure curcumin on WT1 protein level in K562 cell line	119
3.8.3 Effect of duration of pure curcumin treatments on WT1 protein level in K562 cell line	119
3.9 Effect of curcuminoids on WT1 protein level in Molt4 cell line	122
3.9.1 Effect of curcuminoids derivatives on WT1 protein level in Molt4 cell line	122
3.9.2 Effect of concentrations of pure curcumin on WT1 protein level in Molt4 cell line	124
3.9.3 Effect of duration of pure curcumin treatments on WT1 protein level in Molt4 cell line	124

CHAPTER IV: DISCUSSION	127
CHAPTER V: CONCLUSION	133

LIST OF TABLES

TABLE	PAGE
1. Some examples of proto-oncogenes and their products	7
2. Some tumor-suppressor genes and their related cancer	9
3. Some examples of inherited cancer syndromes	11
4. Some well-known chemical carcinogen from the IARC Monograph Databases	12
5. Human oncoviruses and their associated human cancers	15
6. Factors proposed to play a role in leukemogenesis	16
7. The FAB classification of AML	20
8. The MIC classification of AML	21
9. The WHO classification of AML	22
10. The FAB criteria for the subtypes of ALL	28
11. The WHO classification of ALL	28
12. Criteria for accelerated and blast crisis phase of CML	32
13. The clinical features in Rai and Binet staging	36
14. Risk factors for hematopoietic neoplasia	37
15. Some characteristics of leukemic cell lines	45
16. Curcuminoid contents in the rhizome of <i>Curcuma</i> species	55
17. The organic material that is found the turmeric rhizomes	56
18. Biological actions of curcuminoids	60
19. Preparation of bovine serum albumin standard solution	69
20. IC ₅₀ values of curcuminoids derivatives on cytotoxicity of leukemic cell lines	82
21. IC ₂₀ values of curcuminoids derivatives on cytotoxicity of leukemic cell lines	83

LIST OF FIGURES

FIGURE	PAGE
1. Schematic structure of <i>WT1</i> mRNA and gene products with various functional domains	46
2. Structure of the WT1 protein	47
3. Schematic representation of the WT1 protein isoforms	49
4. A proposed scheme for regulation by WT1 in hemopoietic cells	53
5. A stemless rhizomatous of <i>Curcuma longa</i>	54
6. Chemical structure of pure curcumin, demethoxycurcumin, and bisdemethoxycurcumin	58
7. Standard curve of BSA	69
8. Cytotoxicity of curcuminoid mixture on leukemic cell lines	79
9. Cytotoxicity of pure curcumin on leukemic cell lines	80
10. Cytotoxicity of demethoxycurcumin on leukemic cell lines	81
11. Cytotoxicity of bisdemethoxycurcumin on leukemic cell lines	82
12. The WT1 and GAPDH mRNA levels in K562, U937, HL-60, and Molt4	83
13. K562 cell morphology after curcuminoid treatments	85
14. Analysis of the effect of curcuminoid extracts on WT1 mRNA level in K562 cell line	86
15. K562 cell morphology after pure curcumin treatment with 5, 10, and 15 μ M	88
16. The WT1 mRNA levels in K562 cell line cultured in 5, 10, and 15 μ M of pure curcumin for 2 days	89
17. K562 cell morphology after treatment with 10 μ M of pure curcumin for 1, 2, and 3 days	90
18. The WT1 mRNA levels in K562 cell line cultured in 10 μ M of pure curcumin for 1, 2, and 3 days	91
19. U937 cell morphology of after curcuminoid treatments	93

20. Analysis of the effect of curcuminoid extracts on WT1 mRNA level in U937 cell line	94
21. U937 cell morphology after pure curcumin treatment with 5, 10, and 15 μM	96
22. The WT1 mRNA levels in U937 cell line cultured in 5, 10, and 15 μM of pure curcumin for 2 days	97
23. U937 cell morphology after treatment with 10 μM of pure curcumin for 1, 2, and 3 days	98
24. The WT1 mRNA levels in U937 cell line cultured in 10 μM of pure curcumin for 1, 2, and 3 days	99
25. HL-60 cell morphology after curcuminoid treatments	101
26. Analysis of the effect of curcuminoid extracts on WT1 mRNA level in HL-60 cell line	102
27. HL-60 cell morphology after pure curcumin treatment with 5, 10, and 15 μM	104
28. The WT1 mRNA levels in HL-60 cell line cultured in 5, 10, and 15 μM of pure curcumin for 2 days	105
29. HL-60 cell morphology after treatment with 10 μM of pure curcumin for 1, 2, and 3 days	106
30. The WT1 mRNA levels in HL-60 cell line cultured in 10 μM of pure curcumin for 1, 2, and 3 days	107
31. Molt4 cell morphology after curcuminoid treatments	109
32. Analysis of the effect of curcuminoid extracts on WT1 mRNA level in Molt4 cell line	110
33. Molt4 cell morphology after pure curcumin treatment with 5, 10, and 15 μM	112
34. The WT1 mRNA levels in Molt4 cell line cultured in 5, 10, and 15 μM of pure curcumin for 2 days	113
35. Molt4 cell morphology after treatment with 10 μM of pure curcumin for 1, 2, and 3 days	114

36. The WT1 mRNA levels in Molt4 cell line cultured in 10 μ M of pure curcumin for 1, 2, and 3 days	115
37. WT1 protein level in 4 types of leukemic cell line cultured in RPMI 1640 medium	117
38. Analysis of the effect of curcuminoid extracts on WT1 protein level K562 cell line	118
39. The WT1 protein level in K562 cell line cultured in 5, 10, and 15 μ M of pure curcumin for 2 days	120
40. The WT1 protein level in K562 cell line cultured in 10 μ M of pure curcumin for 1, 2, and 3 days	121
41. Analysis of the effect of curcuminoid extracts on WT1 protein level Molt4 cell line	123
42. The WT1 protein level in Molt4 cell line cultured in 5, 10, and 15 μ M of pure curcumin for 2 days	125
43. The WT1 protein level in Molt4 cell line cultured in 10 μ M of pure curcumin for 1, 2, and 3 days	126
44. Molecular structure of curcumin	130

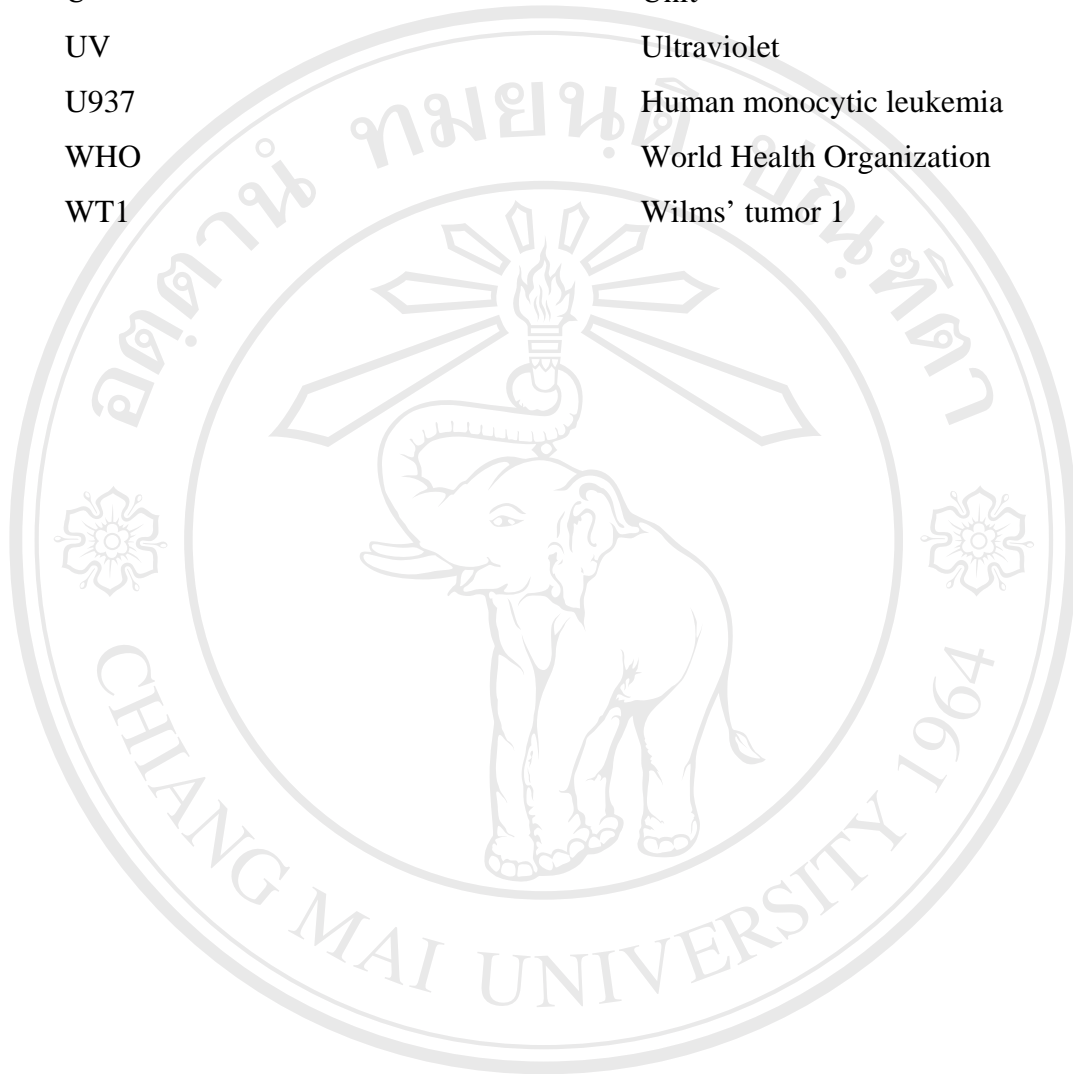

ABBREVIATIONS

%	Percent
°C	Degree Celsius
µg	Microgram
µL	Microlitre
µM	Micromolar
aa	amino acid
ALL	Acute lymphocytic leukemia
AML	Acute myelogenous leukemia
AMLL	Acute mixed lineage leukemia
AMML	Acute myelomonocytic leukemia
APL	Acute promyelocytic leukemia
BM	Bone marrow
bp	Base pair
BSA	Bovine serum albumin
Cal	Calorie
CD	Cluster of Differentiation
CLL	Chronic lymphocytic leukemia
CML	Chronic myelogenous leukemia
CNS	Central nervous system
CO ₂	Carbon dioxide
DEPC	Diethyl pyrocarbonate
dL	Decilitre
DMSO	Dimethyl sulfoxide
DNA	Deoxyribonucleic acid
EBV	Epstein-Barr virus
ECL	Enhanced chemiluminescence
e.g.	exempli gratia (for example)
ELISA	Enzyme linked immunosorbent assay

<i>et al</i>	<i>et alii</i> (and others)
FAB	French-American-British
FBS	Fetal bovine serum
g	Gram
GAPDH	Glyceraldehyde-3-phosphate dehydrogenase
h	Hour
HEPES	N-2-hydroxyethylpiperazine-N-2-ethanesulfonic acid
HIV	Human immunodeficiency virus
HL-60	Human promyeloid leukemia
HLA	Human leukocyte antigen
HNPCC	Hereditary non-polyposis colorectal cancer syndrome
HPV	Human papilloma virus
IARC	International Agency for Research on Cancer
IC ₂₀	Inhibitory concentration at 20% growth
IC ₅₀	Inhibitory concentration at 50% growth
i.e.	id est (that is)
IgG	Immunoglobulin G
kb	Kilobase
kDa	Kilodalton
kg	Kilogram
KTS	Lysine-threonine-serine
L	Litre
LAP	Leukocyte alkaline phosphatase
K562	Human erythroid leukemia
mg	Milligram
MIC	Morphologic- immunologic-cytogenetic

min	Minute
mL	Millilitre
Molt4	Human lymphoblastic leukemia
MPO	Myeloperoxidase
mRNA	Messenger ribonucleic acid
MTT	3-(4, 5 dimethylthiazole-2yl)-2, 5 Diphenyltetrazolium bromide
NADH	Nicotinamide adenine dinucleotide
NK cell	Natural killer cell
nm	Nanometre
OD	Optical density
PAS	Periodic acid shift
PBS	Phosphate buffer saline
PCR	Polymerase chain reaction
PLL	Prolymphocytic leukemia
ppm	Parts per million
RNA	Ribonucleic acid
rpm	Revolution per minute
RPMI 1640 medium	Roswell Park Memorial Institute 1640 medium
RT-PCR	Reverse transcriptase polymerase chain Reaction
SBB	Sudan Black B
SD	Standard deviation
SDS-PAGE	Sodium dodecyl sulfate-polyacrylamide gel electrophoresis
sec	Second
TAE	Tris acetate EDTA
TdT	Terminal deoxynucleotidyl transferase
TEMED	N, N, N, N, -tetramethyl ethylene diamine

U	Unit
UV	Ultraviolet
U937	Human monocytic leukemia
WHO	World Health Organization
WT1	Wilms' tumor 1
