ACKNOWLEDGEMENT

I would like to express my deepest gratitude and sincere appreciation to my advisor, Assist. Prof. Dr. Chatchai Tayapiwatana, for his moral support, excellent guidance, valuable suggestion, kindness and encouragement throughout my study. The thesis could not have accomplished without his understanding and gracious assistance.

I am extremely grateful to my co-advisor Assoc. Prof. Dr. Watchara Kasinrerak for his valuable help, kind advice and many provided experimental materials. My grateful appreciation is also extended to Dr. Sawitree Chiampanichayakul for providing the BW5147 cell lines and kind help.

I would like to specially thank Dr. Nutjeera Intasai, Mr. Chajornsak Trakulpour and Mr. Pramoon Aruncharus for their excellent advice, consultant and kindness. I am very thankful to all staffs in both Dr. Chatchai and Dr. Watchara's lab for their kindness, assistance and friendship. I am grateful to all personnel and faculty members for their assistance in using the equipment at Faculty of Associated Medical Sciences, Chiang Mai University. I am also thankful to the financial support from the Graduated School, Chiang Mai University, the Thailand Research Fund and the National Center for Genetic Engineering and Biotechnology.

Finally, I would like to express my deepest gratitude to my parents for their infinite love, all of their great supports throughout my life, and especially for this Master Degree thesis. In addition, I would like to especially thank Ms. Patchaneeya Thammawong for her advice, consultant, kind help and sharing knowledge.

Phawin Charoensook
