ACKNOWLEDGEMENT

There were several persons here at Department of Physical Therapy who deserve thanks for helping me through my thesis work.

I would first like to express my deep appreciation to my master's thesis advisors, Asst. Prof. Dr.Somporn Onlaor for her incredible guidance as teachers and mentors, for encouraging and nurturing throughout the graduate experience. She was never lacking in kindness and support. Without her teaching, support and positive attitude this thesis would not have been successful.

I would like to express my sincere gratitude to Dr.Samatchai Chamnongkich for his excellent advice, solving technical problems and assistance in data analysis throughout the process. He always supports of data analysis through this thesis.

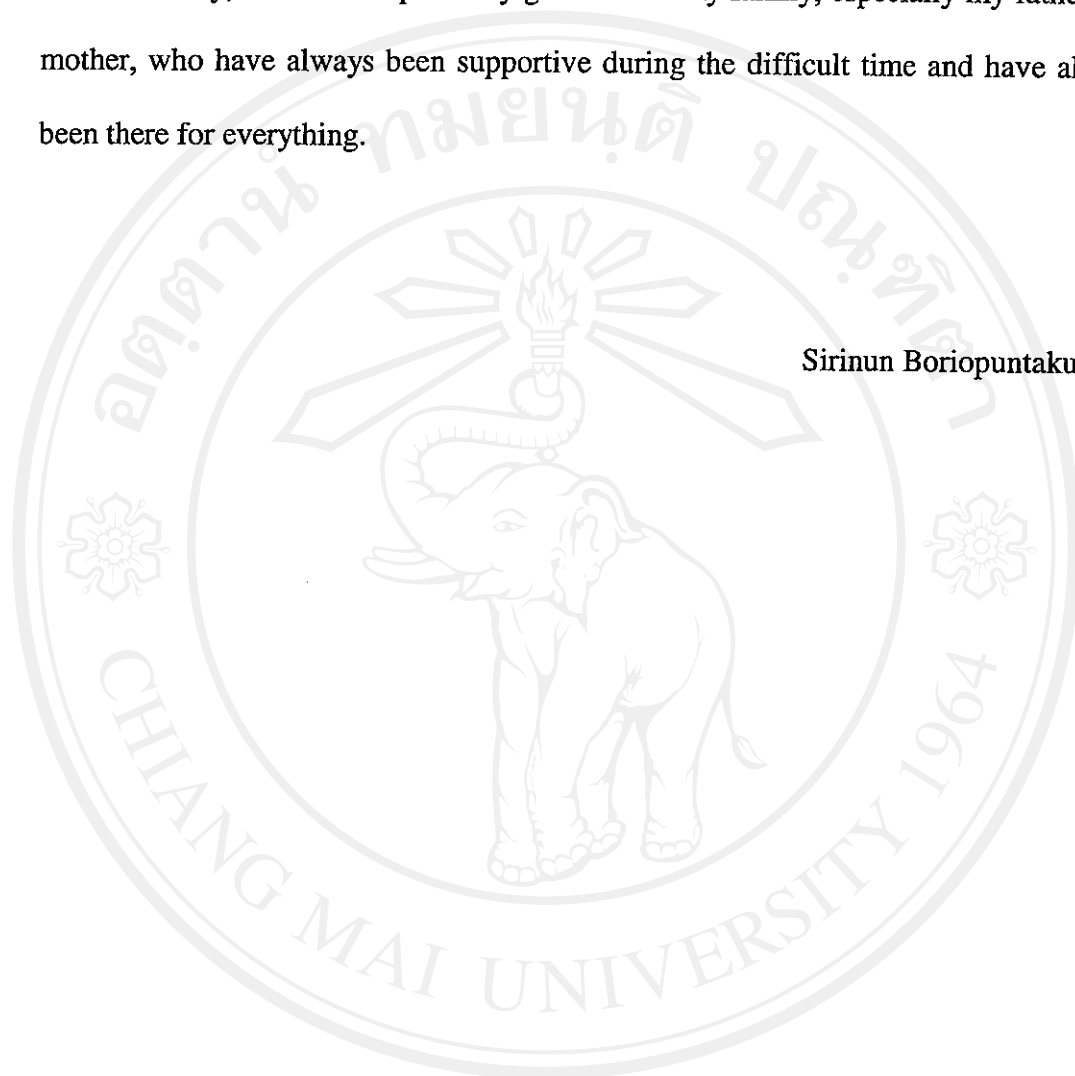

I sincerely appreciate the valuable guidance of Asst. Prof. Dr. Rumpa Boonsinsukh my thesis committee, her suggestions were challenged me to think beyond the obvious answer in developing this thesis.

A very important "thank you" gone to all participants, for sacrifices the time to enroll my thesis.

I would like to thank my wonderful friends, Mr. Surachart Suksriwan, Ms. Jittarat Tansenee and Mr. Theerasak Boonwang for supporting in process of data collection and data analysis.

Finally, I wish to express my gratitude to my family, especially my father and mother, who have always been supportive during the difficult time and have always been there for everything.
