

TABLE OF CONTENTS

	PAGE
ACKNOWLEDGEMENT	iii
ENGLISH ABSTRACT	iv
THAI ABSTRACT	vii
LIST OF TABLES	xi
LIST OF FIGURES	xii
ABBREVIATIONS	xiii
CHAPTER I INTRODUCTION	
1. Rationale	1
2. Operational definition	3
3. Purposes of the study	4
4. Hypotheses	4
5. Application advantages	5
CHAPTER II LITERATURE REVIEWS	
1. Definition of stroke	6
2. Upper extremity impairment of stroke survivors	7
3. Recovery after stroke	10
4. Functional electrical stimulation in neurorehabilitation	11
5. Mechanisms of functional electrical stimulation	
stroke patients	14
7. Recent functional electrical stimulation modalities for stroke	17

8. Limitation of functional electrical stimulation	19
9. Differences between electrical stimulation and exercise	20
10. Task-specific training	21
11. Measurement of upper limb functions in hemiplegia	22

CHAPTER III METHODS

1. Participants	26
2. Outcome parameters	27
3. Equipments	28
4. Experimental setup	28
5. Assessments	35
6. Statistical analysis	36
8. Location	37

CHAPTER IV RESULTS

1. Participant characteristics	38
2. Baseline data	40
3. Comparison between two treatments	43
4. Within group comparisons	43

CHAPTER V DISCUSSION

1. Improvement of mWMFT	56
2. Improvement of Motor Assessment Scale	58
3. Improvement of range of motion	59
4. Decrease of spasticity	60
5. Improvement of sensation	61
6. Improvement of the goal functional task	62

7. Proposed mechanism of ES and TSE	62
8. Participants' satisfaction with TSE and ES+TSE	64
CONCLUSION	65
LIMITATIONS AND SUGGESTIONS	66
REFERENCE	68
APPENDICES	
APPENDIX A Patient information	83
APPENDIX B Modified Wolf motor function test	84
APPENDIX C Motor Assessment Scale (MAS)	86
APPENDIX D Modified Ashworth scale	87
APPENDIX E Barthel Index (BI)	88
APPENDIX F Thai mini mental status examination (TMMSE)	89
APPENDIX G Satisfaction questionnaire (แบบประเมินความพึงพอใจ)	92
APPENDIX H Instruction manual for task-specific exercise	94
APPENDIX I Instruction manual for electrical stimulation and task-specific exercise	103
APPENDIX J Positions of electrodes placement	107
APPENDIX K Daily log book	111
APPENDIX L Information sheet	112
APPENDIX M Consent form	116
CURRICULUM VITAE	117

LIST OF TABLES

TABLE		PAGE
1	The participants' demographics data	39
2	Comparison of duration of home-based training (the first 4-week and the second 4-week) in each group	40
3	Comparison within group of baseline data prior to the treatment	41
4	Comparison between groups of baseline data prior to the treatments	42
5	Mean differences of outcome parameters between task-specific exercise (TSE) and electrical stimulation combined with task-specific exercise (ES+TSE)	44
6	Comparison of mWMFT at week 1 st , 5 th and 9 th in each group	45
7	Comparison of Motor Assessment Scale at week 1 st , 5 th and 9 th in each group	47
8	Comparison of AROM at week 1 st , 5 th and 9 th in each group	48
9	Comparison of PROM at week 1 st , 5 th and 9 th in each group	49
10	Data of the goal functional task performed in individual	50
11	Comparison modified Ashworth scale at week 1 st , 5 th and 9 th in each group	51
12	Data of sensation at week 1 st , 5 th and 9 th in each group	52
13	The summary of agreement levels for TSE program.	53
14	The summary of agreement levels for ES+TSE program	54

LIST OF FIGURES

FIGURE		PAGE
1	The assessment and the appointment schedule during the study	33
2	Procedural diagram	34
3	Comparison of mWMFT-sec at week 1 st , 5 th and 9 th in each group	45
4	Comparison of mWMFT-FA at week 1 st , 5 th and 9 th in each group	46

ABBREVIATIONS

ADL	Activities of daily living
AROM	Active range of motion
BI	Barthel index
cm	Centimeter
CIMT	Constraint-induced movement therapy
CVA	Cerebrovascular accident
ECRL	Extensor carpi radialis longus muscle
EDC	Extensor digitorum communis muscle
EMG	Electromyography
ES+TSE	Electrical stimulation combined with task-specific exercise
F	Female
FES	Functional electrical stimulation
fMRI	Functional magnetic resonance imaging
HBES	Home-based electrical stimulation
Hemor	Hemorrhage
hr	Hour
Imp	Impaired
Inf	Infarction
Infec	Infection
Int	Intact
JTHFT	Jebsen-Taylor Hand function tests

kg	Kilogram
Lt	Left side
LTP	Long-term potentiation
M	Male
max	Maximum
MAS	Motor Assessment Scale
MAS-H	Hand movements of Motor Assessment Scale
MAS-UA	Upper arm function of Motor Assessment Scale
min	Minimum
mo	Month
MT	Movement time
mWMFT	Modified Wolf Motor Function Test
NDT	Neurodevelopmental treatment
QoL	Quality of life
PNF	Proprioceptive neuromuscular facilitation
PROM	Passive range of motion
Rt	Right side
SD	Standard deviation
SE	Standard error
TMMSE	Thai mini mental status examination
TSE	Task-specific exercise
UE	Upper extremity
