## ACKNOWLEDGEMENTS

I did this research study with love and hoped to open physiotherapists to participate with other health professionals to better manage the problems of cancer patients. Often I was discouraged and felt like giving up but I continued. Now, I would like to thank many people who encouraged me to carry on, including my thesis advisor, Dr Orawan Ponggeon, Prof. Sumitra Thongprasert and her colleagues and my patients who kindly took part in the tests and questionnaires and all of my friends. Also, the faculty of Associated Medical Science and Graduate School for granting this study.

I would like to express deeply gratitude and appreciate to my family for their love, warmth, support and encouragement from first to last and lastly to Phung for her support and encouragement, with warmth and love since I came up to Chiang Mai until now.

Khomkrip Longlalerng
