My thanks go first to my advisor, Dr. Sombat Thiratrakoolchai, through the total process of the thesis. He assisted in orienting the topic and gave advice through the duration of research and editing my writing of the thesis.

My thanks go next to all teachers in the Graduate Office of Faculty of Architecture, Chiang Mai University, who provided me with a lot of useful knowledge and experiences in doing architectural research. I am sure I will be able to apply the knowledge learned from the Faculty of Architecture, Chiang Mai University at the College of Sciences in Hue University, Hue city, Vietnam. I hope to be able to teach my Vietnamese students to perhaps develop competency to compete at the international someday.

My thanks go next to the Graduate School – Chiang Mai University who offered me this scholarship to study and research in the Faculty of Architecture, Chiang Mai University.

My thanks go next to Dr. Tran Minh Duc and all architects and engineers in the Central Institute of Science Technology Construction (Phân viện Khoa học Công nghệ Xây dựng Miền trung), who provided me with a lot of valuable knowledge about the architectural conservation and preservation in Hue City and Vietnam.

For my parents, my sister, my brother, and my lover who gave me the motivation and the confidence to overcome all kinds of difficulties during doing my thesis, I show deep gratitude and respect to all of them. Their helps are invaluable with the uncountable supports in the success of my study for the Master of Architecture Degree.
