Acknowledgement	iii
Abstract (Thai)	iv
Abstract (English)	vi
Table of Contents	viii
List of Tables	x
List of Figures	xi
List of Appendices	xii
Abbreviations	xiii
Chapter 1: Introduction	1
1.1 A review of housing development policy of socialist Vietnam from 1954 to the present (2008)	1
1.2 The 35 th resolution for redevelopment project of old apartments	2
1.3 Research problem	6
1.4 Research objectives	8
1.5 Organization of thesis book	15
Chapter 2: Literature review	18
2.1 Building evaluation	19
2.2 Post-occupancy evaluation(POE)	24
2.3 Review of the POE procedure	29
2.4 Summary of literature review	43
Chapter 3: Methodology	45
3.1 Research objectives	46
3.2 Research design	48
3.3 Summary of methodology	64

	Page
Chapter 4: Results	66
4.1 The disadvantages and advantages of the Dong Da complex	67
4.2 Differences of user's satisfactions between user groups in the Dong Da complex	73
4.3 The relationship between the overall satisfaction and satisfactions of users on aspects of building function	86
4.4 The summary of the results	92
Chapter 5: Recommendations	96
5.1 The suggestions for three terms of the Dong Da project implementation	96
5.2 The recommendations of POE method in Dong Da apartment complex	101
5.3 The recommendations to further researches	103
Bibliography	101
Appendices	107
Curriculum Vitae	116

List of Tables

2-1	The classification of POE	26
2-2	The reviewed guidelines of the POE procedures	28
2-3	The synthesized table of five relevant researches	30
2-4	The aspects of building functional quality	33
2-5	The summary of statistic techniques conducted three types POE objective	41
2-6	The derived method of reviewed POE research for the POE Dong Da	44
3-1	The 27 sub-aspects of building function	53
3-2	Distribution of sample in groups of user in Dong Da apartment complex	57
3-3	The statistical techniques conduct to three types of POE objective	59
4-1	The advantages and disadvantages aspects of the A building	68
4-2	The advantages and disadvantages aspects of the B building	69
4-3	The advantages and disadvantages aspects of the C building	70
4-4	Comparing means of the user satisfaction between the user groups of A, B and C building	75
4-5	Comparing means of the user satisfaction between the user groups of floor difference	77
4-6	Comparing means of the user satisfaction between the user group of male and user group of female	80
4-7	Comparing means of the user satisfaction between the user groups of above 9 years occupancy and under 9 years occupancy	81
4-8	Comparing means of the user satisfaction between the user group above standard and user group under standard (12 sq.m /person)	84
4-9	The model parameters of the predictive model of the overall satisfaction by multiple regression with step-wise model	89

List of Figures

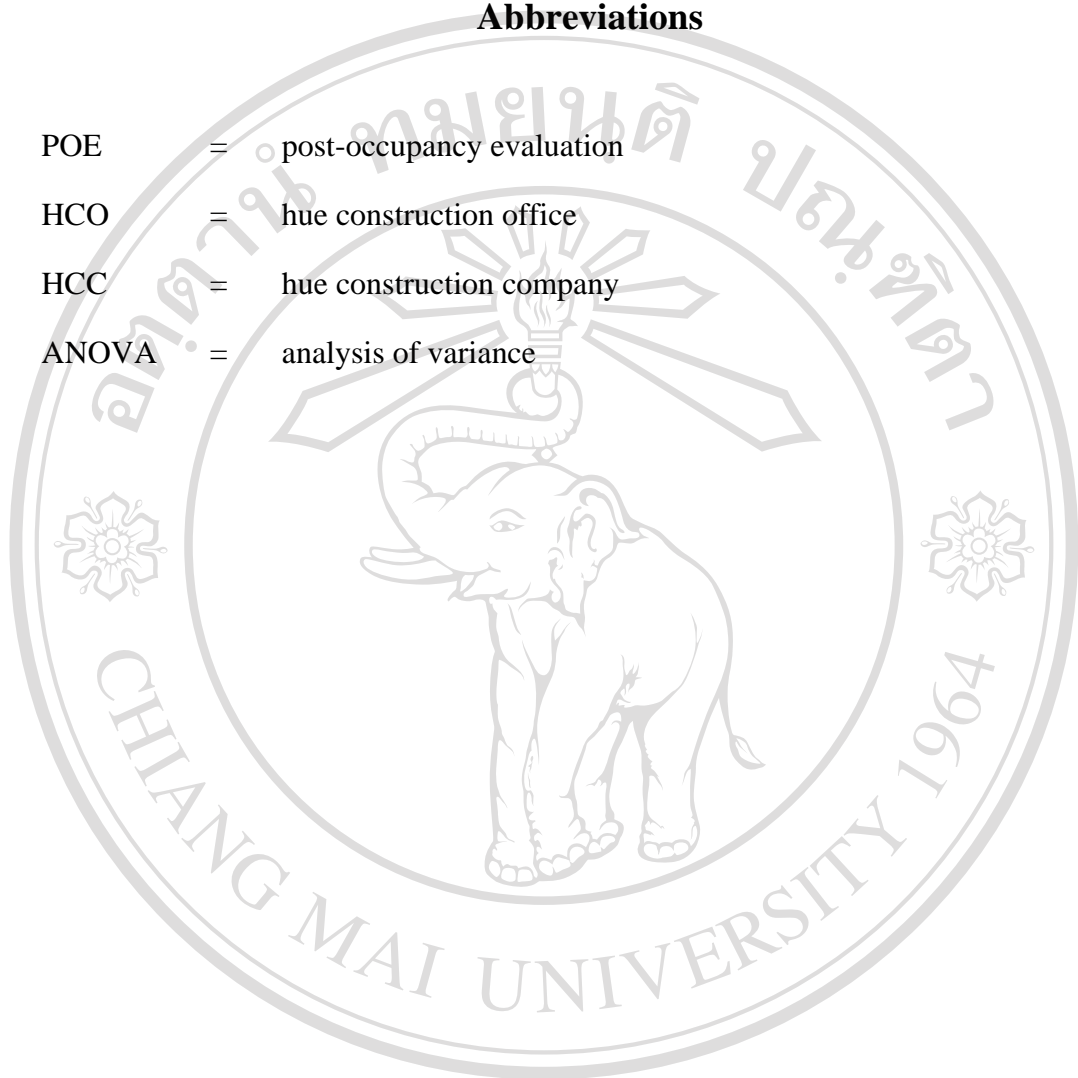

Figure	Page
1-1 Three typical plans of the subsidized apartment	6
1-2 Illustrating old subsidized apartment in 2007	7
1-3 Location of the Dong Da apartment complex	11
1-4 Three buildings of Dong Da apartment complex in Hue, Vietnam	12
1-5 The typical floor plans of three type buildings in Dong Da complex	13
2-1 A cycle of integrative framework for building performance evaluation	21
3-1 Diagram of research design	48
4-1 The chart of comparing means of user satisfaction between user groups of A, B and C building	74
4-2 The chart of comparing means of user satisfaction between user groups of floor difference	76
4-3 The chart of comparing means of user satisfaction between user group of male and female	79
4-4 The chart of comparing means of user satisfaction between user group above 9 years of occupancy and under 9 years of occupancy	81
4-5 The chart of comparing means of user satisfaction between user group above standard and user group under standard (12 sq.m /person)	83
4-6 The summary out put of the multiple regression statistic of step-wise model	87

List of Appendices

Appendix	Sources	Page
1	Information of three types of Dong Da apartment complex Hue Construction Office, 2006	107
2	The aspects of functional quality of buildings in POE research and research tools Voortd, 2004	107
3	The chart of means of user satisfaction of a building on aspects of the functional quality	108
4	The chart of means of user satisfaction of b building on aspects of the functional quality	108
5	The chart of means of user satisfaction of c building on aspects of the functional quality	108
6	Summary of ANOVA result by levels of satisfaction of three groups of users of different building types on overall satisfaction	109
7	Summary of ANOVA results levels by satisfaction of three groups of user of different building type on flexible aspect of building function	109
8	Summary of ANOVA results by levels of satisfaction of three groups of users of different building types on light aspect of building function	110
9	Summary of ANOVA results by levels of satisfaction of two groups of male and female on light aspect of building function	110
10	Summary of ANOVA results by levels of satisfaction of two groups of male and female on interior-climate aspect of building function	111
11	The chart of standardized coefficients of the satisfactions of user aspects of building function with the overall satisfaction of the user of the dong da apartment complex	111
12	Questionnaire form (English version)	112
13	Questionnaire form (Vietnamese version)	114

Abbreviations

POE	=	post-occupancy evaluation
HCO	=	hue construction office
HCC	=	hue construction company
ANOVA	=	analysis of variance
