ACKNOWLEDGEMENTS

The completion of this thesis would mean nothing to me if I failed to acknowledge a number of people who have contributed a great deal of encouragement as well as assistance for this research.

I would like to thank all the people who helped me on this journey:

First of all, Dr. Eduardo Yugo Suzuki and Dr. Boonsiva Suzuki for supervising my thesis. With their enthusiasm, their inspiration, and their great efforts to explain things clearly and simply, they helped to make experimental research fun for me. Throughout my thesis-writing period, they provided encouragement, sound advice, good teaching, and lots of good ideas, even though the writing of the papers was often a painful birth. With their help I learned the rigorous and logical construction of experiments and the writing of papers. I would have been lost without them.

I wish to express my deepest gratitude and appreciation to Associate Professor Dhirawat Jotikasthira, my thesis co-advisor for his special efforts, unforgettable support, and excellent encouragement. This thesis would not have been a complete success without his professional guidance.

I would also like to express gratitude to Dr. M. Kevin O Carroll, Professor Emeritus of the University of Mississippi School of Dentistry, and Faculty Consultant at Chiang Mai University Faculty of Dentistry, for his valuable suggestion and in preparation of the manuscript.

I would also like to express thankfulness to Associate Professor Piyanart Chatiketue and Instructor Narumanas Korwanich for their kind statistics advice in this research project.

I am deeply indebted to Instructor Thepparat Khemaleelakul and Ms. Phannee Odthon, staff in the Dental Laboratory, for their help on the pullout machine.

My sincerest thanks to Mr. Chittakone Thipthammavong, instructor, Prosthodontic and Orthodontic Unit Department of Dentistry University of Health Sciences Laos, for helping with specimen preparation and pullout testing.

I wish to express my thanks of all the members of the staffs of the Department of Orthodontic, Faculty of Dentistry, Chiang Mai University for their helpful suggestions and critic.

My Friends, KISS team, for their friendship, moments we shared, help, support and everything friends are there for.

I would like to acknowledge the financial support from the Faculty of Dentistry, Chiang Mai University.

Finally, I am particularly grateful to my family members, all of whom were especially supportive and extremely helpful, for their understanding, emotional assistance, and encouragement.

I tried to thank everybody who helped me to achieve this goal. Therefore, if some people are missing on this list, I apologize to them at this point and of course thank them very much for their help and presence.

Sirinun Arunyawongsakorn
