ACKNOWLEDGEMENTS

I would like to express my sincere thanks to my advisors, Assoc. Prof. Dr. Boonsiva Buranastidporn and Dr. Eduardo Yugo Suzuki for their warming support, precious suggestion, improvement of this thesis, and pushing me up to the goal of this project.

I also would like to express my gratefulness to my co-advisors, Asst. Prof. Dr. Thongchai Fongsamootr, for his instruction regarding basic knowledge of finite element method, and suggestion for interpretation the results. My deep appreciation is for Assoc. Prof. Dhirawat Jotikasthira, for initiation of this project, and brightening me up throughout this study.

My sincere appreciation is expressed to Mr. Nopparat Seehawong for his accommodating in creating of all finite element models, and training me to processing these models. I would like to express my gratefulness to the Department of Mechanical Engineering, Faculty of Engineering, Chiang Mai University, for facilitating equipment and work place.

I would like to acknowledge the assistance of Dr. M. Kevin O Carroll, Professor Emeritus of the University of Mississippi, School of Dentistry, and Faculty Consultant at Chiang Mai University, Faculty of Dentistry, in the preparation of the manuscript.

My special thanks are also extended to all staffs of the Department of Orthodontics, Faculty of Dentistry, Chiang Mai University, for their supports and suggestions. I would like to express my appreciation to our KISS team (Kamonporn Nanekrungsan, Imjai Intachai, Sirinun Arunyawongsakorn and Sarinporn Torut) for their shared advice, assistance and cheerfulness throughout this quite long journey.

Lastly, I am deeply grateful to everyone in my family, who always gives love, support and encouragement. With love and admiration, I would like to contribute my thesis to my parents who have been my inspiration to go forward with spirit throughout my life.
