Acknowledgements	iii
Abstract (Thai)	iv
Abstract (English)	vi
List of Tables	x
List of Figures	xiii
Chapter 1 Introduction	1
1.1 Background	1
1.2 Significance of the Study	5
1.3 Objectives of the study	8
1.4 Scope of the study	8
1.5 Organization of the study	9
1.6 Benefit of the Study	11
Chapter 2 Theory and Literature Reviews	13
2.1 Theoretical framework	13
2.2 Literature Reviews	21
Chapter 3 Methodology	27
3.1 Conceptual Framework	27

3.2 The functional form of hedonic pricing model	29
3.3 Selection of the variables	31
3.4 Model and Hypotheses	39
3.5 Data collection	40
3.6 Data analysis	41
Chapter 4 Housing Market in China	43
4.1 The development of the housing market in China	43
4.2 Housing market in Kunming	50
Chapter 5 Empirical Results	54
5.1 The descriptive of the housing samples in Kunming	54
5.2 The relationship between housing price and each characteristic	65
5.3 The regression of the hedonic pricing model	81
Chapter 6 Conclusion	92
6.1 Summary	92
6.2 Limitation of the study	94
6.3 Recommendations	95
References	97
Appendix	103
Curriculum Vitae	108

List of Tables

Table	Page
3.1 The housing attributes in former study and their preference in Kunming	32
3.2 The measurement of housing characteristics and the expected sign related to housing price	38
4.1 The GDP and per capita disposable income from 1998 to 2009	50
4.2 The average housing price in Kunming from 2003 to 2009	52
5.1 Age of the house owner	55
5.2 Number of the household members	55
5.3 Educational level of the house owners	56
5.4 Occupation of the house owners	56
5.5 Household average income per month (Yuan)	57
5.6 Price of the housing units	57
5.7 The distance to Central Business District (CBD)	58
5.8 The number of bus routes	58
5.9 Floor area of the housing units	59
5.10 Age of the housing units	59
5.11 Orientation of the housing units	60
5.12 Floor of the housing units	60

5.13 The structural quality of the housing units	61
5.14 The Environmental quality around the communities	62
5.15 The inner environmental quality of the communities	62
5.16 The total distance to the nearest life establishments	63
5.17 The total distance to the nearest educational services	64
5.18 The total distance to the nearest entertainment facilities	64
5.19 The cross tabulation of age of the house owners and housing price	66
5.20 The cross tabulation of number of household members and housing price	67
5.21 The cross tabulation of educational level of the owners and housing price	68
5.22 The cross tabulation of occupation of the house owners and housing price	68
5.23 The cross tabulation of the household average income and housing price	69
5.24 The cross tabulation of the distance to CBD and housing price	70
5.25 The cross tabulation of the number of bus route and housing price	71
5.26 The cross tabulation of the floor area and housing price	72
5.27 The cross tabulation of the housing age and housing price	73
5.28 The cross tabulation of the housing orientation and housing price	73
5.29 The cross tabulation of the floor and the housing price	74
5.30 The cross tabulation of the structural quality and housing price	75
5.31 The cross tabulation of the environmental quality around the communities and housing price	76

5.32 The cross tabulation of the inner environmental quality and housing price	77
5.33 The cross tabulation of total distance to the nearest life establishments and housing price	78
5.34 The cross tabulation of total distance to the educational services and housing price	79
5.35 The cross tabulation of total distance to the nearest entertainment facilities and housing price	80
5.36 The descriptive of the variables	82
5.37 The model summary of the three functional form	84
5.38 The regression coefficient of the linear functional form	85
5.39 The regression coefficient of the log-log functional form	87
5.40 The regression coefficient of the semi-log function form	88
5.41 The ranking of the accepted variables by three functional forms	90

List of Figures

Figures	Page
1.1 The composition of land resource in China	3
1.2 The map of Kunming in Yunnan Province	6
1.3 The scope of the urban area in Kunming	9
1.4 The structure of the study	11
2.1 The Consumption Decision: Utility Maximization	18
2.2 The Production Decision: Profit Maximization	20
2.3 Existence of Market Equilibrium	20
4.1 The real estate market system in China	47
4.2 The composition of the real estate investment from 1996 to 2009	49
4.3 The comparison of the composition of investment in 1996 and 2009	49
