ABSTRACT

The purpose of this study was to examine the state of and opinions of students viewing close-circuit television program of Anubaan Chiang Mai School. Subjects were 345 students. The gathering data tool was questionnaire, which was constructed by the researcher. Questionnaires were employed by the second semester 1998. Data were treated by using mean and percentage.

The results of the study were as follows: (1) Students who viewed close-circuit television program gain more knowledge and think that the program was update. (2) Students agree that the duration used for the program was suitable. (3) The most favorite program ware entertainment and documentary. (4) The close-circuit television of Anubaan Chiang Mai was good and suitable.
