ACKNOWLEDGEMENT

First of all I would like to express my deepest gratitude to the Lao PDR Government, the Royal Thai Government, and the Fogarty AIDS International for Research and Training Program, Johns Hopkins University, for giving me an opportunity to undertake this M.S. course in Health Sciences (International Program) at Chiang Mai University.

I would like to express my sincere gratitude to my advisory committee. My special thanks to Asst. Prof. Dr. Vinai Suriyanon, my major advisor for his guidance, encouragement and valuable suggestions throughout my study.

Dr. Namtip Srirak, Dr. Surinda Kawichai my co-advisors for their comments and suggestions in writing up questionnaire forms and data analysis.

Dr. Chris Beyrer, my advisor and the Director of Fogarty AIDS International for Research and Training Program for his comments on my thesis, a scholarship for granting 2 years and for sending me in the Summer program on Epidemiological course at Johns Hopkins University , Baltimore.

I gratefully acknowledges Dr. Chansy Phimpachanh, Director of National Committee for Control of AIDS Bureau (NCCAB), Dr. Bounpheng Philavong and their colleagues for their support and facilitation during my study, particularly when conducting my research in Laos. My deeply appreciation to Dr. Sithat Insisiengmai, Director of National Center for Laboratory and Epidemiology (NCLE) and his staff for helping me to confirm blood sample testing. I wish to extend my thanks to the Savannakhet provincial health department, Champorn district

authority, district health and the research team for helping me to collect data and also thanks the volunteers for their kind cooperation in my research.

I also wish to thank all the staff of RIHES who ever encourage, help me in the past two years in Chiang Mai (Thailand).

Finally, I would like to give my special thanks to my family and my friends for their loving, understanding, assistance and warm friendship which will never be forgotten.
