ACKNOWLEDGEMENTS

It has been my good opportunity to work with a number of people who helped me in every way they could. Moreover, my research experiences have been glowing up since I met and joined my life with them.

I would like to express my sincere and deep appreciation to my thesis supervisor, Associate Professor Dr. Luksana Makonkewkeyoon, from the Department of Biochemistry, Faculty of Medicine, Chiang Mai University, for her suggestions and technical supports throughout this research study.

My thesis committee, Assistant Professor Dr. Theerapol Sirinarumit, from the Department of Pathology, Faculty of Veterinary Medicine, Kasetsart University, Kamphaengsaen campus originated this research study. He gave his guidance, technical support including financial support and was deeply patient with me during all the time in the laboratory. He is my hero in the way I want to be. He did not teach me only for the laboratory work, but he also taught me to spend my life by using the Buddhism.

Another one in my thesis committee is Dr. Pawin Padungtod from the Department of Veterinary Public Health, Faculty of Veterinary Medicine, Chiang Mai University. He spent his time to help and guide me in every way he could, particularly in manuscript preparation.

My deep appreciation is for Associate Professor Dr. Ted Tesaprateep, the founder dean of Faculty of Veterinary Medicine, Chiang Mai University. He gave me the opportunity to study in this Master degree program.

Many thanks are also given to graduate student and other technicians at the Faculty of Veterinary Medicine, Kasetsart University and Chiang Mai University for their shared laboratory experiences

My family – Mr. Apisit, Mrs. Pannee and Miss Rattikorn Sthitmatee, my dad, mom and sister who always give me the power of life. My grandparents – Mr. Kaew and Mrs. Tabtim Damrhy and Mrs. Jai Kramkratoke, I pray for you every night and hope you can know my success in the heaven. This appreciation is also for you, Miss Arunee Tansuhat.

Finally, thank you for the Ministry of University Affairs for providing financial supports for this study.

Nattawooti Sthitmatee
