Abstract in Thai	e
Abstract in English	g
List of Tables	l
List of Figures	m
List of Abbreviations	n
Chapter 1 Introduction	1
1.1 Statement of the problems and objectives	1
1.2 Anticipated benefits	3
Chapter 2 Review of the literature	4
2.1 Mechanisms of action of local anesthetics	4
2.2 Success rate of inferior alveolar nerve block	5
2.3 Causes of the local anesthetic failure	7
2.4 Pulpal anesthesia in the inflamed teeth	11
2.5 The ways to improve success rate of pulpal anesthesia in the inflamed teeth	14
2.5.1 Changing the local anesthetic agents	14
2.5.2 Increasing the volume of the anesthetic solution	16
2.5.3 Using the supplemental injections	17
2.5.4 Using the adjuvant drugs	22
2.6 Differences of pulp between the young and aged permanent teeth	23
2.7 Sensibility test	25
2.7.1 Thermal testing	26

	Page
2.7.2 Electric pulp test	28
2.8 Anxiety and pain assessment in children	30
Chapter 3 Materials and methods	33
3.1 Research design	33
3.2 Research populations and samples	33
3.2.1 Study populations	33
3.2.2 Sample groups	33
3.3 Operators	37
3.4 Treatment protocol	38
3.5 Data collection	44
3.6 Data analysis	46
Chapter 4 Results	47
4.1 General information	47
4.2 Pre-operative phase	50
4.2.1 After the inferior alveolar nerve block administration	52
4.2.2 After the supplemental intraligamentary administration	53
4.3 Intra-operative phase	56
4.4 Failure rate of inferior alveolar nerve block technique and success rate of pulpal anesthesia in different operators	57
4.5 Agreement and sensitivity of sensibility tests	58
Chapter 5 Discussion	60

LIST OF TABLES

	Page
Table 2.1 Success rates of pulpal anesthesia by inferior alveolar nerve block in teeth with irreversible pulpitis	6
Table 3.1 The diagnosis criteria of each sample group	37
Table 4.1 General information	49
Table 4.2 General information of three groups with different pulpal diagnoses	50
Table 4.3 Cumulative success rates of pulpal anesthesia in different pulpal diagnoses in pre-operative phase	55
Table 4.4 Increased success rates following supplemental IL injection in different pulpal diagnoses	55
Table 4.5 The statistic value (<i>p</i> value) of increased success rate of pulpal anesthesia after supplemental IL injection	56
Table 4.6 Success rates of pulpal anesthesia during intra-operative phase	57
Table 4.7 Failure rate of inferior alveolar nerve block technique and success rate of pulpal anesthesia in different operators	57
Table 4.8 Sensitivity of Endo-Ice® cold test in different teeth position	58
Table 4.9 Sensitivity of EPT in different teeth position	59

LIST OF FIGURES

	Page
Figure 2.1 Mechanism of action of local anesthetics	5
Figure 2.2 Facial Image Scale	30
Figure 2.3 The Wong-Baker Faces Pain Rating Scale	31
Figure 3.1 Flow chart of the experimental procedure (Pre-operative phase)	43
Figure 3.2 Flow chart of the experimental procedure (Intra-operative phase)	44
Figure 3.3 Data collection	45
Figure 4.1 The cumulative success and failure rates of pulpal anesthesia in preoperative and intra-operative phases	51
Figure 4.2 Sensitivity of Endo-Ice® cold test and EPT in different teeth position	59

LIST OF ABBREVIATIONS

EPT	Electric Pulp Test
FIS	Facial Image Scale
IANB	Inferior Alveolar Nerve Block
IANB-PO	Success rate of pulpal anesthesia by IANB pre-operatively
IANB-IO	Success rate of pulpal anesthesia by IANB intra-operatively
IL	Intraligamentary injection
+IL-PO	Success rate of pulpal anesthesia by supplemental IL injection pre-operatively
+IL-IO	Success rate of pulpal anesthesia by supplemental IL injection intra-operatively
WBFPS	Wong-Baker Faces Pain Rating Scale
